End Date

27/09/2026

Plan Summary \*

AyAy Ron is a 28-year-old participant with intellectual disability who requires support with daily living skills, social interaction, and community participation. The primary objectives are to develop independent living capabilities, improve communication skills, and increase community engagement. AyAy shows strong

Participant Strengths

others. Shows strong fine motor skills and takes pride in completing tasks independently. Has good memory for routines once established and demonstrates creativity in art activities. Maintains positive relationships with family and shows enthusiasm for new experiences when properly supported.

Participant Preferences

activities with 2-3 people maximum. Prefers hands-on activities like cooking, gardening, and art. Likes routine but enjoys occasional new experiences when introduced gradually. Prefers female support workers and responds well to calm, patient communication styles.

Family Goals

Family wants AyAy to develop greater independence in personal care, basic
